

# BUILDING A STRONG FERTILIZER CANDIDATE

[WWW.TFI.ORG/ELECTIONCENTER](http://WWW.TFI.ORG/ELECTIONCENTER)

## SAFETY & SECURITY

The fertilizer industry needs candidates that support our efforts to safely and securely source, manufacture, transport and store fertilizer and fertilizer inputs & by-products.

## INFRASTRUCTURE

A fertilizer candidate must understand that fertilizer relies heavily on our nation's entire infrastructure system, from rail to road to waterways.

## TRADE

Fertilizer is a global commodity, therefore reducing trade barriers and ensuring existing trade is free and fair should be cornerstones of a fertilizer candidate.

## ENVIRONMENT

A fertilizer candidate should recognize the value our industry puts on being good environmental stewards and help us to continue our research and efforts in nutrient management.

## ENERGY

Sourcing, manufacturing and transporting the fertilizer our country's farmers depend on all require energy. A fertilizer candidate should support an "all of the above" energy policy.

## WORKFORCE

The fertilizer workforce ranges from mechanics and soil agronomists to welders and geneticists. A fertilizer candidate will ensure the fertilizer workforce of tomorrow gets the education they need today.
