Together, we are Growing the Vote

**We work** in fertilizer, have family in fertilizer, and/or live in a community or state supported by fertilizer and agriculture

**We believe** that supporting a growth agenda for fertilizer and agriculture will build a stronger future for our country

**We understand** that decisions made by our elected officials can dramatically impact our lives, our families, our communities and our jobs

**We aim** to elect officials who support policies where the sourcing, manufacture, transport, sale and responsible use of fertilizer can thrive

**We take pride** in providing the nutrients that grow the world's food, fuel and fiber
